DENTISTRY FOR CHILDREN

Why A Pediatric Dentist

Much like the specialized care of pediatricians, pediatric dentists are trained to address the **unique challenges of oral care** in children-and in supporting parents in caring for their children's health.

Pediatric dentists take **2-3 years of specialty training** after their four-year dentistry degree. As expected, specialty training in pediatric dentistry includes education about oral health that is **specific to infants, children, and adolescents**, but it also involves education in **early childhood development and behavior** that helps them create a special kid-friendly zone in their offices.

Toddlers to Teens Dental

Toddlers to Teens provides a fun, positive dental experience for children while delivering the highest quality care to create and maintain a healthy smile. We have developed a dental home for children that encompasses all aspects of oral health care, including: preventive dentistry, diet counseling, early interceptive orthodontics, restorative dentistry, and trauma education. **Toddlers to Teens is still offering first visits free for children 2 and under.**

Parents always want the best for their children. This also holds true for their dental care. To provide the best pediatric dental care, we must provide the best pediatric dental experience to as many children as we can. At Toddlers to Teens dental we strive to make every child's experience a happy one.

★ DID YOU KNOW?

We have Spanish, German, Russian, Serbian and Tagalog speaking staff and dentists.

OUR SERVICES

Tooth decay continues to be the most chronic disease in young children today. Untreated dental disease can cause and exacerbate serious infection and threaten a child's health. Toddlers to Teens is dedicated to comprehensive dental care for all children, and specializes in providing dental care to children who cannot be treated under conventional means.

We treat children who:

- ★ Are pre-communicative
- ★ Exhibit a high level of apprehension or anxiety
- ★ Have extensive dental needs
- ★ Have had a previously negative dental experience

In addition to restorative dentistry and preventative dentistry, we offer:

- ★ Sports injury prevention (mouth guards)
- ★ Treatment of children with special needs
- ★ Safe and convenient general anesthetic surgery done on-site
- ★ Dental emergencies and trauma with same-day service
- ★ Frenectomies — removal of the frenulum (i.e."Tongue-tied")
